- Optional Customer custom note on checkout step 2 (This can be used as a note to the Shop Merchant or as a personal note to the order eg. when an order is a gift to someone.)
- Embed Self-hosted videos or audio files
- Added a new Dashboard Widget for a quick order overview
- Further SEO Optimization to replace the need of installing an SEO plugin
- General Performance Improvements
- Product Ratings (integrates the known wp Postratings plugin)
- More flexibility for the PDF invoice generated (theme settings for better control)
- Added advanced price formatting. You can now select from various options in the theme settings

- Increased overall security
- Featured Area can now include pages in combination with categories or alone

1.0.5

- Fixed lightbox (missing "t") and caption
- All currencies are now supported
-
- added page-category hybrid navigation
-
- added the option to exclude subcategories from appearing behind the main category images on the Front Page
-
- adjusted the subcategory navigation for shops going only upto 2nd category level deep
-
- better support for the „Shop by“ widgets drop down when using a narrow sidebar
-
- added the option to enable subcategory drop downs on the Main Category Navigation
-
- fixed the jquery issue with the product navigation (the animation stoped alltogether after a few mouseovers)
-
- added the option to custom select which of the 2 Related Product Tabs you'd like to have open on the single product page
-
- made opening affiliate products in a different tab optional
-
- rewrote the NWS Sales, NWS Sale 3Links and NWS Special Offers widgets. These are now renamed as NWS Promotions, NWS 2Link Poromotions and NWS 3Link Promotions - the entire thing is now more user friendly and easier to replace images :)

1.0.4

- Added Magic Zoom Plus as an option among the product image effects
- Improved Emails send out and PDFs created by the Shop

1.0.3

- The membership area and the shop are now entirely optional.

1.0.2

- Option to disable the image "slide" effect on the Front Page, Category Pages that display categories and Category Pages that display products
- Option to maintain a regular Blog Section along with your Shop. I still need to adjust the demo so you can see the Blog section but until I get to it please [see here](#) as the blog part is the same

- Option to disable related products when viewing the Shopping Bag
- Display "Shop By" widgets also as select drop down (not only as rows of images)
- More "Shop by" widgets
- Style
- Brand / Labels / Producer / Manufacturer
- Price
- and a "Shop by" - All Purpose one to cover what I did not think about :)
-
-
- Fixed appearance when uploading only one product image
- Option to use different Image effects on the Product's Single Page. Now supporting jQzoom and FancyBox as alternative options to Magic Zoom. As well as no effect at all!
- Option to display an image thumbnail instead of the default numbered tab
- Option to have Images (or just one image) alongside an embedded video (they appear in their own tab!)
- Option to embed a video with simple custom shortcodes. Supported sites include:
 - Vimeo,
 - YouTube,
 - Google Video,
 - Blip TV,
 - Veoh,
 - Viddler,
 - Revver

Adjusted the help files to include instructions on the new features.
